

Complex Formulas. Simple Solutions.

Vicinity's scalability makes it a top choice among batch manufacturers. It integrates easily with Microsoft Dynamics—to deliver a comprehensive software solution that grows with your business.

At Vicinity, we offer implementations and upgrades adapted to suit each client's needs, responsive ongoing technical support, and accessible expert-level business consultation, making us a dedicated partner to Value Added Resellers (VAR) and manufacturers. Whatever operational challenges you or your customers are experiencing—simple to complex—we are equipped to provide efficient solutions.

Designed on the .NET platform, Vicinity provides a single point

of integration with the most popular financial and distribution management applications. That means Vicinity offers process manufacturers the ability to automate and improve more of their operation with less implementation effort or operational disruption than ever before. Combine that with a highly experienced network of VAR's who know your business, and clients can expect a more rapid implementation tailored to your needs delivering a faster return on your investment.

Integrated with leading Microsoft Dynamics ERP systems BC, GP, NAV, & SL.

Vicinity software has proven integrations with each of the Dynamics SMB ERP solutions. With quarterly software releases, Vicinity maintains a fast-paced deployment schedule to stay up-to-date with the latest versions of BC, GP, NAV, and SL while preserving system support to keep data seamlessly in sync.

Designed exclusively for formula-based manufacturing.

Vicinity is built to enhance the investment in Dynamics ERP by cutting costs while supporting growth through improvements in efficiency. Our code is catered to the intricacies of batch manufacturing and our formula-based production application allows for the needed flexibility while delivering a rich feature set across production logs, scheduling, and quality.

Access to a dedicated team of formula manufacturing experts.

Vicinity is powered by a team of software developers, technical experts, and business consultants with 30+ years of experience working with batch manufacturers. Our team has led successful implementations in industries spanning the batch manufacturing market. Count on Vicinity as your go-to batch manufacturing resource.
